

CONTROL YOUR **SENSITIVE DATA** WITH A SINGLE TOUCH

comforte provides automated near real-time discovery, mapping, and tracking of sensitive data

comforte accurately and continuously catalogs your data to meet all your needs: **Governance, Risk, Security, and Compliance**

Unlike other solutions, comforte's network-analytics approach ensures you don't have to know where to look for your data. We find it for you

NEAR REAL-TIME AUTOMATED DATA DISCOVERY

- ▶ **Automatic discovery**, mapping, and tracking of sensitive data and its flow
- ▶ **Identifies copies** of sensitive data within the organization
- ▶ **Easy to deploy**
- ▶ **Integrates** with leading industry products such as RSA Archer and OneTrust
- ▶ **Linear Scalability** that will meet the most complex and demanding environments

CONTINUOUSLY MONITOR AND ANALYZE YOUR SENSITIVE DATA

- ▶ Dynamically updates to show how network elements process sensitive data
- ▶ Enforces policy for effective data use
- ▶ Maintains an accurate inventory of locations of sensitive data

A CLEAR INTERFACE OF YOUR OWN MASTER CATALOG

- ▶ Provides **data lineage** for data subjects across structured and unstructured data sources
- ▶ **Ensures regulatory compliance** around sensitive data
- ▶ Automates and **simplifies the DSAR process** through rich APIs
- ▶ **Unifies visibility** by providing a **consolidated view** of all personal data

You are committed to reducing your company's privacy and security risk. However, ensuring constant visibility of sensitive data across your entire organization is nearly impossible with the growing complexity of your company's network.

With the convergence of security, privacy, and data governance, systems are more interconnected than they have ever been. Current data tracking systems protect areas that are known to contain sensitive data. Usage is dynamic and always evolving. At any given time, there's no way of knowing all the places to look for sensitive data. And yet, you're still required to keep it secured.

We provide your organization with a clear picture of how your data is being stored, processed, and shared in near real-time. Comforte helps companies identify and reduce their risk by automatically discovering unknown uses of sensitive data while saving you time and money.

*You don't have to know where to look for your data. **comforte finds it for you.***
