Company:	comforte AG
Job Location:	Negotiable
Contract type:	Full time permanent employment (40h/week)
Experience:	At least 2+ years of experience in DevOps and Linux system administration with a solid knowledge in scripting, networking, CI/CD tools and infrastructure management.
Education:	At least Bachelor in Computer Science (or similar subject), or higher degree
Reports To:	DevOps Teamlead
Start date:	At earliest convenience

Role

In your role as DevOps Engineer you become a key part of our agile DevOps team that designs and maintains company's internal solutions including Infrastructure as Code, CI/CD pipelines, QA automation and much more.

In your role as DevOps Engineer you are responsible for:

- Design and configure virtual solutions for private virtual environment (vSphere, Terraform)
- Creation, maintenance, enhancement and monitoring of Continuous Integration und Delivery (CI/CD) services (GitLab, Docker, Artifactory, Icinga)
- Producing and maintaining relevant CI/CD documentation
- Playing integration role between products teams in order to create product-specific build & release configurations (GitLab)

Required technical skills

Excellent and extensive skills and background knowledge in:

- Linux (CentOS/Ubuntu). Windows server (2016/2019) and BSD-family OS's are a plus.
- Solid knowledge and proficiency in Linux Shell Scripting. Windows Powershell is a plus.
- Good knowledge of TCP/IP, SFTP, SSH, TLS/SSL, REST protocols
- Working experience with CI /CD tools (GitLab, Jenkins). Artifactory is a plus.

- Source code version control systems (Git).
- Practical experience in IaC (infrastructure as code) and provisioning tools (Terraform, Ansible).
- Virtualization technologies (VMWare, VirtualBox). vSphere is a plus.
- Database knowledge (MySQL, PostgreSQL). MS SQL is a plus.
- Experience with container-based solutions (Docker). Kubernetes is a plus.

Plus:

- Familiarity with cloud platforms (Google cloud, AWS, MS Azure)
- Proficiency in programming (Python, Java). Other OO and/or functional languages (Go) are a plus.

Required Domain Knowledge

Excellent and extensive skills and background knowledge in:

- Virtualization and container technologies
- Linux system administration

Professional Traits and Aptitudes

- Team player with a positive general attitude to solve complex issues
- Must have strong diagnostic and problem-solving skills
- Willing to continuously learn and improve skills to keep up with technology changes
- Self-learner with an ability to work independently and remotely with minimal supervision
- exceptional communication skills, both in written and in verbal form.

Communication

- **English:** Required to be fluent both in oral and written communication
- **German:** Language skills are helpful but not a requirement
